

A close-up photograph of an industrial machine, likely a TAS (Twin Air System) for air conditioning or ventilation. The image features several white, cylindrical pipes or ducts arranged in a complex, intersecting pattern. A central vertical pipe is prominent, with a small, dark, conical component at its base. To the right, a horizontal pipe is secured by a metal clamp. In the lower-left foreground, another horizontal pipe is visible, also secured by a metal clamp. A green, textured mesh or filter is positioned behind the central vertical pipe. The background is dark and out of focus, emphasizing the mechanical components. The letters "TAS" are overlaid in white, sans-serif font in the center of the image.
